SAU Supply air unit

SAU is designed to give a pleasant indoor climate, controlling the heat and providing clean air.

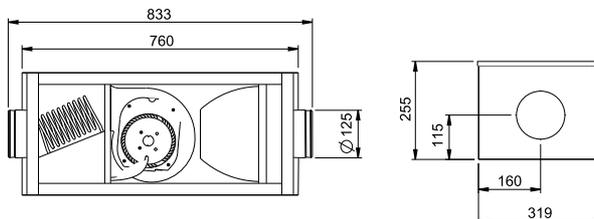

SAU is delivered complete with filter, fan and heater. SAU 125 and 200 can be controlled with a control-unit with two switches; heater on/off and fanspeed 0/1/2.

The electrical elements are also possible to regulate externally together with a pulser.

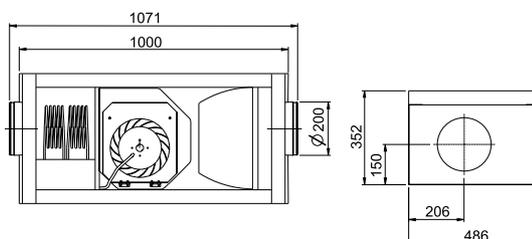

To regulate SAU 250 E with water battery, use 3-way valve and control equipment. SAU can be mounted in a warm or cold area, as it is insulated with 50 mm mineral wool covered with pre-galvanized sheet metal.

Alternative filters for the unit are: G4, F5 and F7 (see diagram).

Explanations to sound data

The sound data have been compiled by means of sound measurement methods as follows:

Pressure and flow: ISO 5801

Determination of acoustic sound level in duct: ISO 5136

Determination of acoustic sound level in reverberation room: ISO 3741

Designations

L_{WA} tot: Total A-weighted sound power level dB(A) (ref 10^{-12} W) = the sum of the sound power level in the octave ranges.

L_{WA} : A-weighted sound power level in octave range dB(A) (ref 10^{-12} W).

L_{pA} : A-weighted sound pressure level in dB(A) according to normed A-weighting correction and relating to an effective absorption area of 20 m² with half spherical translation at a distance of 3 meters.

Technical data

Water battery at airflow :

250l/s och 45°C DT

Power	Water temp	Pressure drop	Flow	Connection
14,7kW	60/40	11,2kPa	0,18l/s	18mm

200l/s och 50°C DT

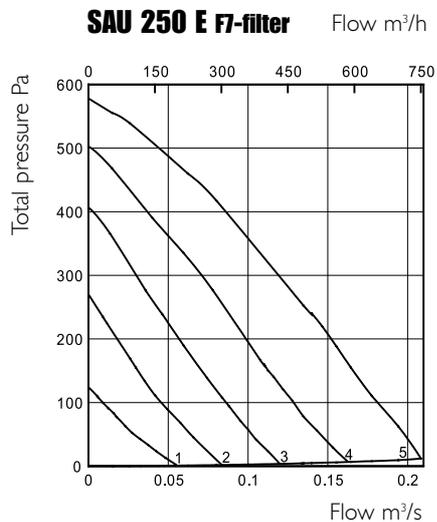

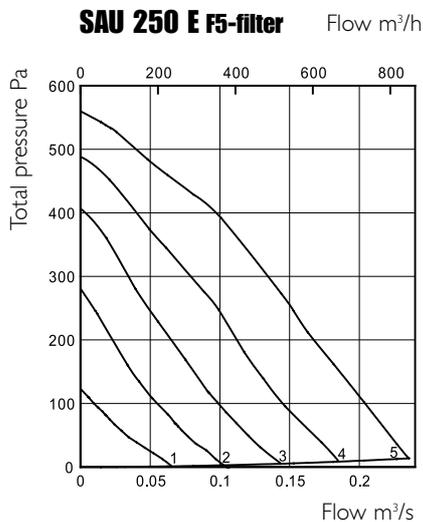

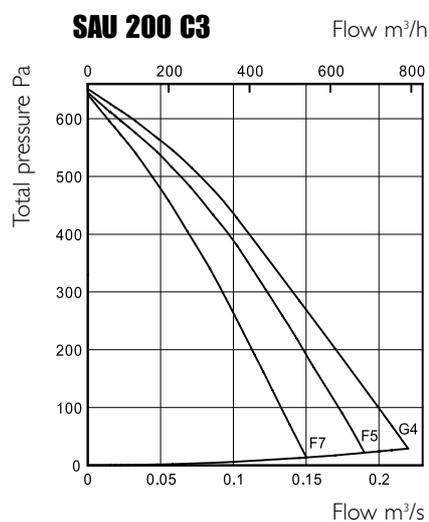

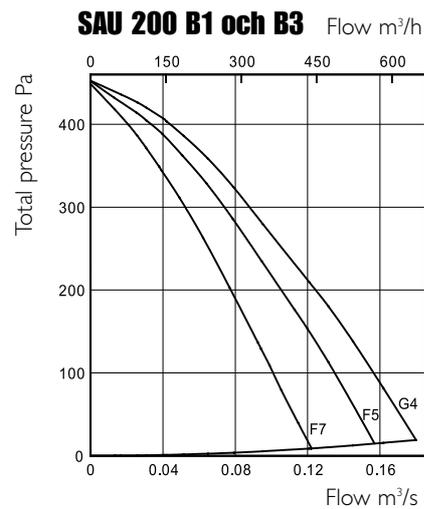

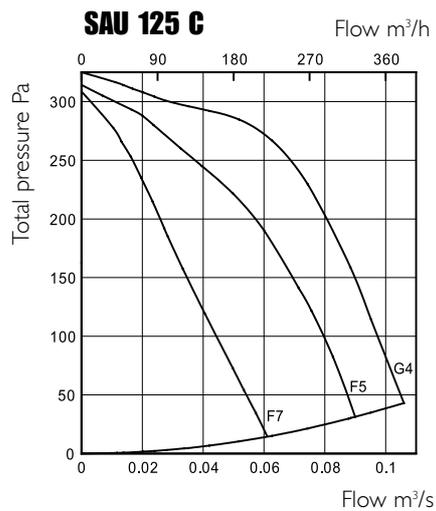

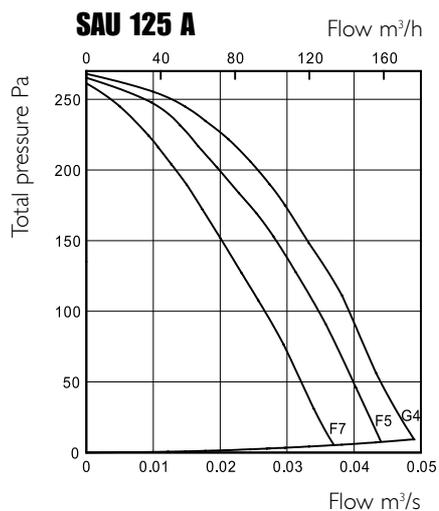

Power	Water temp	Pressure drop	Flow	Connection
12,7kW	60/40	8,5kPa	0,15l/s	18mm

150l/s och 55°C DT

Power	Water temp	Pressure drop	Flow	Connection
10,3kW	60/40	5,9kPa	0,12l/s	18mm
